## 1. Conversion of Nelito Systems Limited to a subsidiary

In June 2019, DTS purchased additional shares of Nelito Systems Limited (“Nelito“) based in Mumbai, India, and made it a consolidated subsidiary to expand DTS’s global business in the financial industry.

## 2. Treasury stock acquisition

Acquired treasury shares in May 2019 to improve capital efficiency and raise the return to shareholders (approx. 177 thousand shares, approx. 800 million yen).

## 3. Improvement of the effectiveness of corporate governance

After the 47th Annual General Meeting of Shareholders, Independent Officers accounted for a majority, seven out of 13 Directors. DTS will continue its efforts to ensure the effectiveness of its corporate governance.

## 4. Stock split

In July 2019, DTS conducted a two-for-one split of common stock to increase stock liquidity.

# Consolidated Results

Net sales increased ¥3,240 million year-on-year, including the new consolidation of Nelito and a change of the accounting period of Digital Technologies Corporation (“DTC”), thanks to DTS’s strong non-consolidated results, such as the year-on-year growth of the financial industry business.

Operating profit rose ¥470 million year-on-year mainly as a result of increased profit based on sales growth and improved profitability based on reduced unprofitable operations, which more than offset a reactionary fall from special demand in the embedded business of the previous year.

The operating margin for the first three months under review exceeded 10% for the first time since the start of quarterly account settlement.
